

Danial Rahimi

Full Stack Developer

Profile

Full-stack Software Developer with several years of experience in backend and frontend development, focusing on Python, Django, .NET Core, and modern web technologies. Experienced in building practical and efficient systems, developing APIs, and designing databases. Worked on AI-assisted projects such as automated data collection systems, as well as e-commerce and content management platforms. Proficient in C#, C++, and JavaScript, with hands-on experience in Django REST Framework and Blazor. Comfortable working both independently and as part of a team, with a focus on delivering reliable, maintainable, and user-oriented software solutions.

Education

- **Bachelor's Degree in Computer Engineering**
Islamic Azad University, Qazvin, Iran
2021 - 2025

Linux

Projects

- **Egg Counting System - CRM - Inventory Management**

Maximum

2023 - 2025

Egg Counting System: A system based on object detection that automatically counts eggs and stores the data in a database. It provides interactive reports to users for monitoring inventory and trends.

CRM System: Used by the sales team to create and manage tasks, track customer interactions, and improve sales workflow and follow-ups.

Inventory Management: Keeps track of product stock in the warehouse, updates quantities automatically when goods enter or leave, ensuring accurate inventory control.
